

Are you ready for NetDMR?

NetDMR is a tool for regulated Clean Water Act permittees to submit discharge monitoring reports (DMRs) electronically via the Internet to U.S. EPA. This system allows facilities to discontinue the use of paper forms for reporting, thus making it easier for facilities to comply with regulatory

requirements. This training will introduce you to this new system.

What will be covered?

- What is NetDMR?
- The benefits of using NetDMR
- How to get an account
- How to submit your DMR data

Who should attend?

- Certified operators at facilities with KPDES permits
(Certified operators are eligible for up to three hours of continuing education credits that can be used for renewal purposes.)

Cost: **Free**

Three session dates are currently available:

Madisonville—Fri., Nov. 9, 2012

Class time: 12:30-3:30 p.m. CST
MTEC Building
755 Industrial Road
